

# Lidiya Kelay

## Software Engineer

### Summary

---

Hard working and passionate job seeker with a strong organizational skill to secure Junior position as a software developer. Ready to help team achieve organization's goal.

---

### Experience

#### Gabi dating app

Feb 2022 - June 2022

This app was developed as a team. It's a dating app developed for Ethiopians. It has a nearby feature where people can find someone near their location. Implemented using flutter and laravel

#### Food Delivery app

April 2022 - Oct 2023

This e-commerce app is based on flutter Getx Package. I used Getx package to manage the state and routing of the app. I have also used Getx for api client. I used Getx for products display, maintaining the state of the shopping cart, profile page and many other features of this e-commerce app or shopping app.

#### Expense Tracker

June 2023

This app is to help us make our financial usage better by notifying user when user exceeds budget, showing us reports incase we need to check on our expenses. this app is still on development. I am in charge of full stack mobile application development. Including Firebase Authentication, storage and notification.
